

Dear Prof. Moreno-Vázquez,

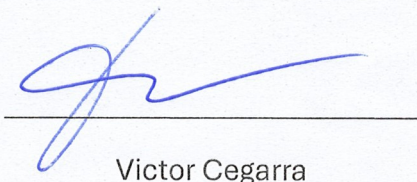

We agree to participate as ongoing peer-reviewers for the activities described in your **“Interoperating to Prioritize Resilience in Crop Wild Relatives (INTERPRESS)”** proposal to the *2025 Plan Nacional Proyectos de Generación de Conocimiento*.

This participation will include (but not necessarily be limited to, at our discretion) participation in an introductory tele-meeting to introduce the teams and establish expectations (one hour), and subsequent participation in yearly quality-control/usability/effectiveness surveys where we will give you feedback on your novel knowledgebase and tooling, from the perspective of a commercial breeder. You have indicated that these yearly interactions will require approximately two hours of our time, and this is acceptable to us. Our feedback will be incorporated into your progress reports to the Ministry, and we understand that we will be able to review these before they are submitted. We also understand that we may request anonymity, or complete removal, of some or all observations from these reports if we have proprietary concerns. We also understand that our interactions with your tools will be visible to your research team, but will not be visible outside of this group, and we can request deletion of all records of our interaction with your tools at any time.

Given these terms, we look forward to the success of your funding proposal, and look forward to interacting with you in the manner described above.

Sincerely,

Meijel, December 12th , 2025

Victor Cegarra

For and on behalf of Lammers Seed Options B.V.
